SOME PROJECTS WORKED ON

Ex-Mays Website

URL: <http://www.exmays.net>

This website is a full online community website developed for the ex-students of Mayflower School, Ikenne. Registered users on this site can edit their own profile and view those of other users on the site. Users can also participate in the online forum/discussion board on site and send short messages to the site. They can also change their user settings on the site

Was the main programmer for this project and was also the SQL admin man

Silverdale Schools Website

URL: <http://www.silverdaleschoolslagos.com>

This is the official website of Silverdale School, Lagos. Parents can download admission form or fill it online from this site. Parents can also participate in the discussion board implemented on site. Other downloads are also possible on this site

Platinum Shields Website

URL: <http://www.platinumshields.com>

Was part of the team that developed the Platinum Shields Solutions (a. k. a. PSL Technologies) website

My Housing Shop

URL: <http://www.myhousingshop.com>

This is a real estate site. The main aim of the site is to provide a market place where users/people can buy and sell real estates and similar properties. This is still under construction.

McQuill Solutions Website:

URL: <http://www.mcquillonline.com>

Was the main PHP/MySQL programmer for the project. Also did some of the HTML/CSS/Graphics design of the site

Visual HR Software:

URL: <http://www.visualhr.com>

This is software written but yet to be completed by Multisoft Consulting Ltd. Wrote some of the modules in this .NET platform project. The modules worked on include Bank Reports and the Payroll-Selections Selector Modules

Aphoe Anti-Virus

URL: http://www.mcquillonline.com/apole/Aphoe_AV_3.zip

This is an MS-DOS based application or batch file that detects and removes about nineteen recent virus files from a computer system when the antivirus is run. Wrote and coded the whole application from the first version i.e. version 1.0.01 to the present version (3.0.08)
